## EXERCISE – 9

### Question

**Execute and display the results of the following Nmap Timing and performance commands in Kali Linux Operating System:**

(i) Polite IDS evasion
(ii) Normal IDS evasion

### Aim

To execute and display the results of the Nmap timing and performance commands in Kali Linux.

### 1. POLITE IDS EVASION

**Command:**

nmap -T2 127.0.0.1

**Use:**

The -T2 timing option performs a slower, more cautious scan and is commonly referred to as a polite timing mode.

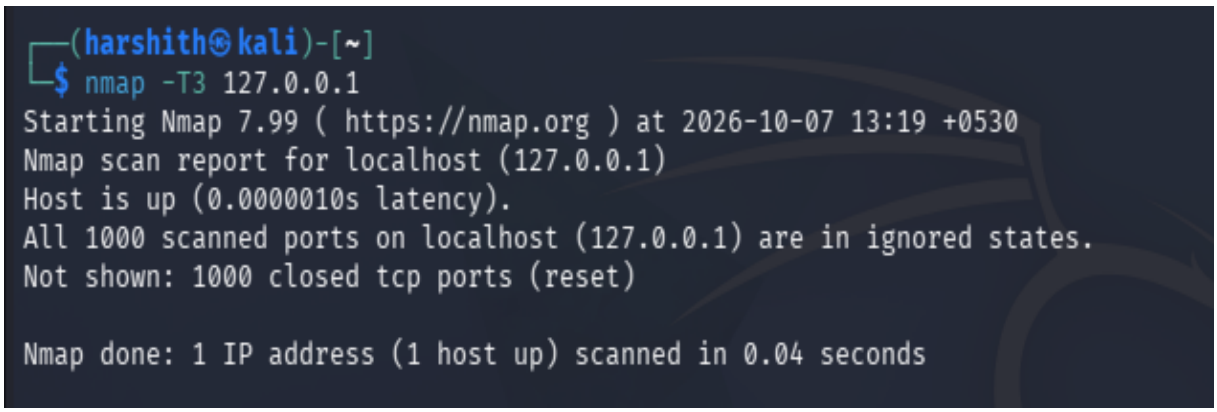

### 2. NORMAL IDS EVASION

**Command:**

nmap -T3 127.0.0.1

**Use:**

The -T3 timing option uses the normal/default timing behavior for an Nmap scan.

**Result**

Thus, the Nmap timing and performance commands were successfully executed in Kali Linux and their results were displayed.
